

Beaver Tail Seat

Model Number

BTS-24

You ask, we listen, and we get to work to come up with something functional and fun. We asked those folks in the prairie provinces what they would want in a sculptured seat. The beaver tail was suggested. And dam, we did it! Like the master builders that beavers are, we busily went to work. Nanaimo artist, Jeff King sunk his teeth into the creative process, and we are pleased to introduce the Beaver Tail. Made with 100 percent recycled sturdy cast aluminum, it is good for the environment and when placed near a river or stream, it will bring hours of seated enjoyment. Who knows! You may just see an eager beaver do a double take as it swims by.

Material Specifications

Marine Grade Aluminum Frame
Stainless Steel Hardware
Super Durable Powder Coating

Customized Solutions

Custom Powder Coating
(Setup Charges May Apply)
