

MODENA LARGE CAPACITY CURVED TOP WASTE RECEPTACLE

Model Number : MCTR-57

Foot Pedal Shown is Optional

DESIGNER NOTES

This unit came about as a request from one of our customers for a larger capacity unit that had the same look and features of the 30 gallon version. They wanted a unit that would essentially hold more waste in higher volume areas and require less visits for emptying. The unique pedal mechanism provides a hands-free experience for the user and closes tightly enough to prevent critters such as squirrels and birds from accessing the interior. The innovative hidden front door release makes it easy for maintenance crews to empty the bag without having to carry a key or struggle with frozen locks. The receptacle opening was designed specifically with a limited 6" or 8" opening to deter local residents from disposing of their household waste. The sloping top design prevents people from placing garbage on top and also diverts water away from the interior. Stylish, durable, and functional, this model looks great alongside the Modena Park Bench or Straight bench. Matching Modena recycling stations also available.

AVAILABLE RECYCLED PLASTIC LUMBER COLOURS
