

Forest Regular Double Stall Outhouse Building

Model Number

FSTB-2

The Forest Double Stall Outhouse was designed at the request of one of our customers asking for a building that could potentially have multiple washrooms all under one roof system, as the John series roof design could not allow for this. We created a slanted roof design so there could be as many toilets in a row as the space allows. To date, we have built as many as four in a row. Similar to the John series the Forest Regular Double Stall addresses many of the issues typically associated with outdoor latrine buildings in semi-remote locations. These include transportation and handling, assembly, and the use of materials that require minimal maintenance over several years in a wide range of diverse environments. The Forest meets and exceeds these expectations. Strategically designed as a modular system, the individual components can be easily carried into semi-remote locations and be put together with minimal tools at a fraction of the traditional wood and concrete alternatives. The building is made from sturdy lightweight powder coated aluminum components, making it resistant to corrosion. The tongue-in-groove recycled plastic lumber slats will not rot or absorb moisture and can be sprayed with bleach or disinfectant without damage. After cleaning, excess water simply drains out the sides from the raised walls. They fit seamlessly into channels with only a few hidden fasteners, also making the unit theft and tamper proof. Lack of lighting normally associated with these types of structures has also been addressed with a translucent one-piece roof. It provides plenty of light but it does not compromise its strength and acts as an effective barrier against sun, wind and rain. The one-piece roof structure caps the entire unit providing ample protection from the elements and locks the whole structure together making it extremely solid. expectations while providing a very comfortable and memorable user experience. Although its name Forest seems quite natural for the application, it actually shares the name of one of the owner's grandsons.

Material Specifications

- Marine Grade Aluminum Frame
- Stainless Steel Hardware
- Super Durable Powder Coating
- 100% Recycled Plastic Slats
- Western Red Cedar
- Accoya Modified Pine
- Hardened Bamboo

Recycled Content

- Recycled Content by Weight: 65%
- 100% Recyclable

Customized Solutions

- Custom Powder Coating (Setup Charges May Apply)
- Toilet, urinal, toilet paper dispenser, sanitizer dispenser and vent stack are not included.
- All Aluminum Floor. (ALF-2) x 2
- Waterless Toilet System by Toilet Tech.
- INST- 3.75 Stainless Steel Concrete Wedge Anchor Bolt Down Kit

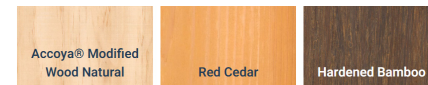

Product Dimensions

- Height: 96 inches / 244 cm
- Depth: 55 inches / 140 cm
- Width: 96 inches / 244 cm
- Weight: 1450 lbs / 658 kg

100% Recycled Plastic Lumber Colours

Unstained Natural Wood Alternatives

OVER 30 POWDER COATING COLOURS *Premium powder colours incur a surcharge per item
