

APROPRIATE INSTALLATION – SURFACE MOUNT

All site furnishings must be installed on a solid, level surface.

Surface mounting to a concrete pad is the preferred method of installation.

Surface mounting to other surfaces such as pavers, paving stones, or stand-alone pre-cast concrete blocks (or footings) is not recommended.

Although many contractors and installers have their own methods of mounting and hardware/fastener preferences, Wishbone can also provide installation kits that are compatible with our products by request.

For an example surface-mount-to-concrete installation please refer to our **“Wishbone Product Install Manual”** included with all Wishbone products and available online.

For complete warranty information please refer to our **“Wishbone Warranty”** available online.

Guideline For Recommended Slab Sizes

Benches: Maximum 16” off the front seat, Minimum 3” on both sides & back.

Straight Benches: Minimum 12” off the front & back of the seat, minimum 3” on both sides.

Tables & Receptacles: 4” all the way around.

Depth (for all items): minimum 3.5”
